Objetivo: Crear un Gem en ruby que permite conectarse al webservice de FedEx para obtener las tarifas de envíos.

Modo de uso de la Gem después de instalar en un proyecto de Rails:

```ruby
quote_params = {
    address_from: {
        zip: "64000",
        country: "MX"
    },
    address_to: {
        zip: "64000",
        country: "MX"
    },
    parcel: {
        length: 25.0,
        width: 28.0,
        height: 46.0,
        distance_unit: "cm",
        weight: 6.5,
        mass_unit: "kg"
    }
}

rates = Fedex::Rates.get(credentials, quote_params)
# example response
[{
    "price": 218.05,
    "currency": "mxn",
    "service_level": {
      "name": "Standard Overnight",
      "token": "STANDARD_OVERNIGHT"
    }
  },
  {
    "price": 139.08,
    "currency": "MXN",
    "service_level": {
      "name": "Fedex Express Saver",
      "token": "FEDEX_EXPRESS_SAVER"
    }
  }
]
```
